The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply							
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

The drawings were received on 22 March 2005. These drawings are accepted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7, 9-10, 12-13, 16-21, 23-27, 29, 31-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Nawa. Nawa discloses a cylindrical reel driver having gear teeth engaged with the supply reel, axially extending spline elements 121a accommodated in grooves 112a of a drive hub 1 10 and a stop element 124a disposed at a distance from the upper end of drive element 120 that is greater than the distance of the spline elements from the upper end of drive element 120 (note that the stop element 124a is formed on flange 124 at the lower end of cylindrical portion 121), and motor 60 for rotating the reel driver.

Re claim 2 the "reel plate" as claimed is the member 110 of Nawa.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person Art Unit: 3654

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 6, 8, 11, 14, 15, 22, 28 and 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nawa.

With respect to claims 6 and 15 the particular distance between the splines and the outer diameter of the motor portion 62 in Nawa would have been an obvious design consideration to one of ordinary skill in the art since the distance is not seen to be critical to operation of the device.

In regards to claims 8, 22 and 28 whether the upper portion of protrusions or stop elements 124a of Nawa are "planar" as claimed would have been obvious to one of ordinary skill in the art since it appears to be immaterial whether those portions are planar or any other shape as long as they are able to function as stops.

Regarding claims 11, 14 and 30 likewise, whether the surface of member 110 of Nawa that engages the stop element 124a is "planar" would have been obvious to one of ordinary skill in the art for the same reasons as set forth above, i.e. the shape is unimportant – it would function as a stop no matter the shape.

Response to Arguments

Applicant's arguments filed 22 March 2005 have been fully considered but they are not persuasive. Nawa clearly discloses the spline elements are directly registered circumferentially around and adjacent to the motor (paragraph 26, lines 16-30).

Art Unit: 3654

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Evan H Langdon whose telephone number is (571)272-6948. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kathy Matecki can be reached on (571) 272-6951. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
